## CLEVELAND COUNTY WINS BIG PRIZE AT THE INTERNATIONAL FARM SHOW

CHAMPION CROP GROWING COUNTY OF STATE IS DECIDED IN EXPOSITION.

### ARNOLD MARTIN'S RECORD

ONE NEBRASKA MAN TOOK INDIVIDUAL AWARDS AMOUNTING TO TOTAL OF \$1,125.

### LIST OF ALL THE AWARDS

Jury Awards Completed Task of Deciding Over One Thousand Separate Awards.

Cleveland County, Oklahoma, is the champion crop growing county represented at the International Dry Farming Congress and Exposition in a competition open to the world.

This Oklahoma county, whose set of first place won at state fairs in past years is large, helped all former laurels at Tulsa last night by winning in the largest class of entries ever entered in a similar competition in the southwest. The cup is a silver trophy cup given by the local commercial club but the monetary value is nothing compared to the honor of winning a first prize on such an occasion.

Four judges officiated as the jury awards. Prof. W. H. Fairfield, superintendent of the Dominion Experimental farm at Lethbridge, Alberta, is older judge, and he is assisted by L. A. Price, professor of soil mechanics at the Kansas Agricultural College; A. H. Ladd, superintendent of the station at College station, Texas; and S. J. Booth, professor of horticulture and botany at the Oklahoma Agricultural and Mechanical college.

This year all county, district and state awards at the International Exposition are being made on a basis of four divisions, including number of varieties, moisture content, and educational value-weight. The most honored division is crop which won in agricultural fairs, some of the awards in grain, tuberous roots, oilseeds, etc. The work of the dry farming contestants, however, seems to have been the best feature of the crop entries, the first being to stock, soil and manure crops for what they are, how they were grown, and what needs there good to be eliminated. A total of 2,800 are listed as individual entries, and when the judges went to decide the leading entries they found Cleveland county excelling in this feature as in some others.

"Competition was as keen in this class as in any I have ever judged before," said Superintendent Fairfield, last night. There were seven or eight entries in Oklahoma section. Cleveland county's class was for the press and it took an entire day to come to a decision between them. At the end, however, the entire jury of experts was unanimous for Cleveland county.

Arnold Martin of Buffalo, Nebraska, is the all-around champion farmer of the International Soil Products Exposition. Yesterday Paul Gerlach of Allen, Saskatchewan, proved his superiority in the matter of poison gas hard when by winning the \$1,200 Rumbel threshing machine given by the Rumbel company of LaPorte, Ind.

Today, however, Mr. Martin came into his own by winning a total of \$1,125 worth of prizes in a number of collective classes which were not connected. To begin with Mr. Martin, whose exhibit occupies the half of one room in Stiles Exhibit Building No. 2, showed a collection of grass and forage seeds which was not equalled in the entire exposition. It won for him an An Arbor combination hay baler and six-horse power gasoline engine complete, value \$125, given by the An Arbor Machine Company of An Arbor, Mich. This baler is adapted for use with any gasoline engine, and a unique feature of the prize is that Mr. Martin may select for himself the make of engine which he desires and the company will then buy it for him and deliver the whole outfit free, freight prepaid, at Mr. Martin's station of Buffalo, Nebraska.

Mr. Martin also won \$100 in gold given by the Hall Manufacturing Company of Peoria, Ill., for the best collective exhibit made by a farmer of his own products, based on his own farm. For his exhibits of grasses and forages he will be given a Kansas City hay press, valued at \$225, and donated for the occasion by the Kansas City Hay Press Company of Kansas City, Mo. A pasture surface cultivator valued at \$40 also went to Mr. Martin for the best display of all varieties of corn.

Frank Thralls of Hydro, Oklahoma, one of the good farmers of his section, carried off the collective award for the best exhibit of grasses and forage crops open to Oklahomans only. The prize was \$25 worth of seeds given by the Bartlesville Seed Co., of Oklahoma City.

A. Ferguson of Guthrie, Oklahoma, took first money for a collective exhibit of fruit shown by an individual farmer. He won a six-shovel two-horse cultivator valued at \$75, given by the International Harvester Co. of America.

### AGREE TO ABIDE BY ELECTION RESULTS

ALL MEXICAN CANDIDATES HELD CONFERENCE WITH HUERTA YESTERDAY

### DON'T EXPECT ANY TROUBLE

Troops and Police Are Ready to Suppress Any Disturbance That May Arise.

MEXICO CITY, Oct. 25.—As a final preliminary to the holding of the general election tomorrow all the candidates present in the capital gathered this afternoon at the national palace at the call of President Huerta to discuss questions relating to the future conduct of the candidates. As a result of the conference General Huerta announced his intention to make a formal proclamation embodying the agreements arrived at.

These agreements in general terms were that the candidates abide by the results of tomorrow's voting. Should any candidate be shown to have polled enough votes to constitute his election the others are to assist him in pacifying the country and placing it on a sound financial and industrial basis.

On the other hand, should there not be enough votes cast to fulfill the requirements of the law and the election for that reason be declared of no effect, all those concerned are to aid Gen. Huerta in every possible way to accomplish the same ends, pending the voting and holding of new elections.

Class 46.—Standard Red Milo Maize—First, C. A. Slocum, Haskell, Okla.; second, William Mittendorf, McAlester, Okla.; third.
